**TOPS**  
Our tops are made of « Top Gun » canvas and carry a 5-year warranty against excessive fading. Our full camper tops cover the entire deck, including the foredeck, thus preventing water infiltration under the door.

**ROTOCAST BASES**  
Furniture bases are made of roto-cast plastic.

**SEAT COVERING**  
By improving furniture covering to be softer and cozier, we have reached a new level of comfort.

**GATES**  
The gates are anodised and mounted on 1 1/4" (33 mm) tubes. The snaps, to fasten the top, are pre-installed on the gates. An adhesive strip between the gate and the fasteners reduces unpleasant noises caused by vibration. On our luxury models, some sections of the gates are lined with a foam product, thus considerably increasing rigidity. Finger savers come standard on all models.

**ABYC WIRING**  
Terminals and connectors are waterproof. We meet ABYC (American Boat and Yacht Council) standards, the highest in the marine industry.

**RADIOS/CD/MP3**  
SOUTHLAND installs only the best: marine grade CLARION. (MP3 available on deluxe models only)

**FIBERGLASS MODULES**  
The addition of two fiberglass modules in the front, gives the pontoons a racing boat look. Without forgetting their remarkable capacity of storage.

**NAVIGATION LIGHTS AND CORNERS**  
On upscale models, corners are made of moulded aluminium, coated with baked-on paint. The cleats are built-in.

**LADDER**  
The rear ladder folds and is both stylish and comfortable. Made of anodised aluminium, its steps are slip-proof.

**FIBERGLASS HELM**  
You are in total command with the Champagne model's fiberglass helm. At no additional cost, enjoy ergonomics and esthetics at their best. So much control in such little space is truly fantastic!

**SINK**  
The acrylic sink comes with a high-quality stainless steel drain and integrated stopper.

**SINK COVER**  
Made of baked laminate.

**FAUCET**  
Comes with an electric pump.

**GLOVE COMPARTMENT**  
The acrylic glove compartment is surely the biggest on the market.

**DOOR**  
Made of acrylic and designed to match the glove compartment. Its long-lasting and impeccable finish is also maintenance friendly.

**COOLER**  
Comes standard on the Champagne and X-Stream RA models. It has storage capacity of 2.4 cubic feet, a laminate door and a stainless steel handle.

**TINTED WINDSHIELD**  
Secured with quick release fasteners.

**SILVER GAUGES**  
Red lighting.

**CONTROL KNOBS**  
Lit, easy to find and have attractive retro styling.

**STAINLESS STEEL EYEBOLT**  
This U-shaped eyebolt is fastened to four Z-shaped crossmembers, under the deck.

**NOSE CONES**  
On Champagne and X-Stream RA models, nose cones have splash guards that improve looks and sturdiness.

**TOPS**  
The tops are attached to the railing thanks to quick release fasteners. Furthermore, rear stern lighting is built into the top's tubing. On the deluxe models the bimini top is 7 feet high (2.1 m), thus offering more than enough clearance for taller passengers. Very much appreciated is the depth of the rear bimini, that covers 9 feet (2.6 m) of floor space.

**STORAGE**  
Sundeck storage on our Champagne model is fantastic. Never has a pontoon offered this much. As for our X-Stream RA model, you are in for a surprise with the chaise lounges. You will appreciate their remarkable storage capacity.

**SUNDECK**  
The sundeck on the Champagne is so wide. You can make it into a very comfortable extra-large bed; and that, without having to handle or add cushions. 66" by 69" (1.6 x 1.7 m).

**DRESSING ROOM**  
The dressing room, which is 22" (552 mm) wide by 29" (711 mm) deep, offers plenty of room.

**ELECTRIC MOTOR**  
All our pontoon boats could be equipped with an electric motor.

**MOTOR MOUNT**  
We build the sturdiest motor mount on the market. In order to support more powerful engines, its all-aluminium body is bolted to 4 (or 5) Z-shaped crossmembers. Extensive testing has convinced SOUTHLAND that extending the motor mount beyond the tubes is better. Customers have confirmed that this method ensures perfect stability.

**DECK**  
The deck is made of 3/4" (19 mm) douglas, 7-ply, pressure treated (.40 CCA), marine grade plywood. The deck has a lifetime warranty against rotting, and, since it is screwed to the crossmembers every 8" (203 mm), SOUTHLAND extends this warranty to also cover warping.

**CARPET**  
Marine grade carpet quality is 28 oz (840 g) on Champagne, X-Stream RA, Luxuria RA and Luxuria models. On other models, it is 20 oz (600 g).

**TUBES**  
Since we at SOUTHLAND take your safety seriously, our tubes consist of 4 to 6 separate airtight chambers, each measuring maximum 5 feet (1.524 m). Each chamber is sealed with a rigid wall. SOUTHLAND tubes are 25" (635mm) in diameter on our luxury models. The marine grade aluminium (5052-H36 or 5052-H32) is .081" (2.05 mm) thick.

See photo montage on pages 18 & 19 showing various features and options. Some features shown may not be available on all models. You can find the complete list of standard and optional equipment on pages 22 & 23.

A third tube definitely improves the performance of a pontoon boat. This option permits the installation of an hydraulic steering system and the tube performance kit. Let's look at these performance details more closely

**Better performance**

Because a pontoon equipped with the third tube floats higher, it glides above the waves instead of crossing them, eliminating friction. This also allows to increase swiftness while not requiring more horsepower than a pontoon boat equipped with 2 tubes.

**Exceptional manoeuvrability**

A three-tube pontoon, equipped with the hydraulic steering system, is much easier to drive when turning and docking. With the middle toon WPT(Wide Performance Tube,) the bends are exceptional. Its "V" and flattened bottom shape, 36" (91 cm) wide x 28" (71 cm) deep, allows to race at high speed even in waves.

**Better stability**

The optional 34-gallon fuel tank built into the central 3rd tube increases the balance and cruising range of the pontoon. This eliminates the need for the tank under the sundeck, making room for even more storage.

**Smoother ride**

A third tube improves pontoon stability. Since the third tube increases contact with water at the center of the craft, the wave's pitch and surge effect is practically eliminated.

**Fuel economy**

Not only does the third tube improve performance, but better fuel economy is also achieved since less friction equals less work for the engine. In addition, the underside of the three-tube pontoon boat is entirely covered with aluminium, thus hiding the crossmembers. This eliminates another significant source of friction, further promoting fuel economy.

**More capacity**

A pontoon boat equipped with three toons greatly increases the load and power capacities.

Central teak floor path (full teak floor also available)

Mahogany hand-railings on doors

Rond teak table

Mahogany executive table, 54" x 22" (137 cm x 56 cm)

Teak step and half-cone set

**TEAK AND MAHOGANY**

SOUTHLAND, a leader manufacturer in Canada, earned recognition for its original products at the Toronto International Boat Show. SOUTHLAND now offers teak and mahogany on its pontoons, a first in the industry. SOUTHLAND furnishings made of teak or mahogany include tables, handrails, footboards and the deck.

**Signature SOUTHLAND**

The designers at SOUTHLAND are always looking for something new to make their product stand out from the rest and further elevate Signature SOUTHLAND. This time, they have chosen to offer teak and mahogany on their pontoons. We are talking about authentic wood fibre, not a cheap imitation of.

For this reason, they called on the co-operation and expertise of a company which, for the last 10 years, has specialized in manufacturing and installing furniture and decks made of teak and mahogany, including for the boating industry.

**TOP-OF-THE-LINE**

Through the years, the pontoon industry has continuously added equipment and refined its products. Pontoons now offer a level of comfort and luxury matched only by their convenience. The time had come to design these crafts with materials that increase their value significantly. Teak and mahogany are luxurious and attractive. They are also easy to recycle. In addition to being dignified and welcoming, they age beautifully and are easy to maintain. Finally, teak and mahogany are very comfortable. Walking on a teak deck, and feeling its warmth is practically therapeutic.

**LONGEVITY**

Longevity is a good indicator of the quality of a product. Tables and decks made of teak or mahogany offered by SOUTHLAND have almost unlimited longevity. The rubber fasteners holding each slat making up the deck are heat and water resistant. Developing this fastening material required years of research to make sure temperature fluctuations and water contact would alter neither its properties nor its appearance.

SOUTHLAND is proud to have contributed this advancement in water sports and opened possibilities for even more development.

Mahogany rectangular table

Mahogany sink cover

1. Dressing room  
2. Removable dressing room

Half cones/deck

Half cone with stairs & optional lighting

Front glass door

Oval baked laminate table

Multi-function module

LED light on bimini top's tube  
Minimum space required for installation is 3/4" (20 mm), 2" clearance. halogen is 17,5" long (44.5 cm)
